You may find different procedures work better for you.Comb your beard in the direction that it grows to help reveal stray hairs that may be longer than the others.Attach the guide comb to trim and taper your beard. With the blades pointing toward you, begin with the 5-position guide set at a long trimming length. For best results, start at each sideburn and stroke downward toward your neck. Trim toward your chin in smooth, overlapping strokes, following the lay of your beard. If you trim against the way your beard naturally lays, the trimmer will cut the hair much shorter and the result may be patchy. Adjust the guide comb to progressively shorter settings until you reach the desired length of beard. You may wish to set the guide comb to cut closer near the ear and down under the chin, changing to a longer setting toward the front of the face and point of your chin. Always be sure the guide is snapped solidly into the desired position before you start to trim.Remove the 5-position guide and cut the outline of your beard. Starting under your chin and working back toward your jawbone and ears, cut the outer perimeter of your beard underneath the jawbone. Continue the line all the way up to the ears and hairline.Accentuate your beard line by using the trimmer in a downward motion. Start at the line you’ve created and, working from the chin back toward the ears, trim the area right under your beard line.Define theNewest Added: 09864 79520-3101P 05567-200 09307-300 05622Tags: Wahl Trimmer, Wahl 09685, Wahl Nose Hair Trimmer, Wahl 09864, Wahl Home Products Rechargeable Groomer, Charging Instructions For Wahl Home Products Rechargeable Groomer, Wahl Micro Groomsman MANUALS & CATALOGS | WAHL GLOBAL Manuals & Catalogs.
